FOR IMMEDIATE RELEASE

ATTO Releases Major Updates to ATTO360 Storage and ATTO360 Networking Suites

Version 2.00.9 Brings Email Alerts, Smarter AI, and Easier Management

Amherst, NY (January 28, 2026) – ATTO Technology, Inc., a global leader in high-performance storage connectivity, today announced version 2.00.9 for its two flagship management platforms: ATTO360™ Storage Suite and ATTO360 Networking Suite. These applications—tailored respectively for high-performance storage adapters (SAS, Fibre Channel, NVMe) and Ethernet networking adapters—now deliver powerful shared enhancements including configurable email notifications, automatic version detection, enhanced ATTO ExpertAI, flexible discovery controls, and fully bundled installations.

The updates make proactive monitoring, rapid setup, and secure management even more accessible for data-intensive workflows in media & entertainment, AI, scientific research, enterprise IT, and high-performance computing.

ATTO360 Storage Suite v2.00.9
An all-in-one software tool that features workflow profiles and one-click optimization of ATTO ExpressSAS® Host Bus Adapters, ATTO Celerity™ Fibre Channel Host Bus Adapters, ATTO ExpressNVM™ Smart NVMe Switch Adapters, and ATTO ThunderLink® Thunderbolt™ to Fibre Channel and Thunderbolt to SAS adapters connectivity. This release streamlines configuration and diagnostics for mission-critical storage environments.

ATTO360 Networking Suite v2.00.9
Designed specifically for ATTO FastFrame™ NICs and ATTO ThunderLink Thunderbolt to Ethernet adapters, this update enhances Ethernet network optimization, troubleshooting, and performance tuning in storage networking scenarios.

Shared Key Enhancements in Version 2.00.9 (Both Suites):

- **Email Notifications** — The flagship new feature: Configure ATTO ExpertAI to send diagnostics and alerts via email to multiple recipients. Set severity thresholds (e.g., critical issues only) and custom policies—keeping teams informed without constant app monitoring.

- **Automatic Version Detection** — Proactively detects updates to the software, drivers, and ExpertAI; notifies users in-app or by email with direct download links—ensuring systems stay current effortlessly.

- **Revamped UI and Enhanced ATTO ExpertAI** — Cleaner, more intuitive interface plus expanded analytics. New ExpertAI guidance includes congestion/flow control advice, detailed workarounds, performance boosts, and downtime prevention strategies.

- **Opt-In/Out Network Discovery** — Users in high-security environments can disable remote discovery for fully local operation while retaining all features. Redesigned discovery page improves device tracking and speed.

- **Bundled Suite Installations with Firmware** — Single-download packages include the app, relevant drivers, and firmware—no more juggling multiple files. Storage Suite bundles SAS/Fibre Channel/NVMe support; Networking Suite covers Ethernet optimization.

- **Quality-of-Life Improvements** — Extensive bug fixes, speed optimizations, and GUI refinements eliminate setup friction and configuration headaches.

"Version 2.00.9 delivers the proactive intelligence and simplicity our customers demand across both storage and networking domains," said Tim Klein, President & CEO, ATTO Technology. "Whether managing high-speed Fibre Channel archives or Ethernet-based workflows, teams now get smarter alerts, easier tuning, and greater flexibility—freeing them to focus on results, not tools."

Availability & Support
ATTO360 Storage Suite v2.00.9 and ATTO360 Networking Suite v2.00.9 are immediately available as separate downloads from ATTO's website (https://www.atto.com/). Each includes bundled drivers, firmware, and dependencies for their respective adapter families. Full technical documentation, release notes, and support resources ensure quick integration. Compatible with Windows®, macOS®, and Linux®.
